NPCC Members and Entities of the NERC Registered Ballot Body,

The subject project is posted on the NERC Website and a ballot is underway and closes at 8pm on September 16th, 2015. The NPCC Regional Standards Committee has reviewed the revisions proposed for the standard and solicited input from the Task Force on System Protection. The project proposes to address directives from FERC in Order No. 803 regarding Automatic Reclosing. The definition for Automatic Reclosing was revised to add supervisory relays, the associated voltage sensing devices and control circuitry. The addition is relatively straightforward and NPCC, as the Regional Entity, will be voting **Affirmative** to accept the standard. We have not been made aware of any issues precluding support.

If you have any questions please contact me.
