NPCC Members and Entities of the NERC Registered Ballot Body,

The NPCC Regional Standards Committee (RSC) has evaluated the subject standards currently posted for "Additional Ballot" through 8pm 1/25/2016. The RSC has not reached full consensus on a balloting recommendation however the majority of those responding have indicated their organization intends on voting affirmatively. Dissenting RSC members are based on opinions that the standard isn't "needed" and that sufficient mechanisms to ensure data quality are already in place, lessons learned from the blackout have increased awareness of the need for quality of data, consistency of reporting, availability of the systems providing the data etc. In addition there seems to be an issue in some of the other Regions which is driving these standards and some believe there should be Regional Standards developed specifically in those regions to deal with the issues in those respective parts of the continent.

NPCC as the Regional Entity doesn't see a detriment or reliability related concern with the proposed standards and also there appears little if any additional costs associated with the standards. Also to note is the NERC Board and FERC have indicated a reluctance to adopt further Regional Standards and prefer continent wide solutions as opposed to regional ones. NPCC will be supporting the standards and voting "Affirmatively" and casting a "Positive Opinion" on the non-binding polls. If you have any questions please contact me. NPCC will also be submitting comments and posting them on the NPCC website at :
https://www.npcc.org/Standards/Regional%20Standards%20Comments/Forms/Public%20List.aspx

Thank you,

Guy V. Zito
