NPCC Compliance Position Announcement

July 15, 2015

To: NPCC Primary and Alternate Compliance Contacts

Subject: TPL-001-4, R2.7, Corrective Action Plans

The NPCC position on TPL-001-4, R2.7 associated with the Corrective Actions Plans (CAP) is the following:

- The determination by an entity that a CAP is necessary as per R2.7 does not constitute an obligation to self-report to NPCC.
- It is recognized that a solution may take years until it is commissioned. As long as the entity develops documented solutions in the CAP to all of the identified reliability needs and makes a good faith effort to get these solutions into service, the entity will be considered compliant with TPL-001-4.
- A determination on compliance will be made by NPCC at the time of any compliance monitoring engagement.
- The CAP does not need to be filed with NPCC for approval at any time prior to the compliance monitoring engagement.

This announcement will be memorialized on the NPCC website under the Compliance tab and was sent via email to all CDAA Primary and Alternate Compliance Contacts on July 15, 2015.

Regards,

Scott Nied
