Subject: NERC Ballot Recommendation- 2007-06 System Protection Coordination - PRC-027-1

Importance: High

NPCC Members and Entities of the NERC Registered Ballot Body,

The subject ballot will close at 8pm on September 11, 2015. The NPCC Regional Standards Committee and the Task Force on System Protection have reviewed the standard and commented on the previous draft. The Standards Drafting Team has been responsive to our comments and at this time there is consensus to recommend approval and vote affirmative on both the ballot and non-binding poll.

NPCC will be submitting some minor comments on the standard and also will be suggesting the Implementation time should be extended from 12 months to 24 months in order to provide the industry with additional time to develop a process, establish Fault current baselines, and a tracking tool for baseline changes and/or periodic review.

Please contact me with any questions.

Thanks,

Guy V. Zito
