Subject: NERC Ballot -Project 2013-03 Geomagnetic Disturbance Mitigation

Importance: High

NPCC Members of the NERC Registered Ballot Body,

The NPCC Regional Standards Committee (RSC) has reviewed the subject standard currently posted for comment and an initial ballot, through 8pm, July 30th 2014. The RSC has not reached a consensus on a ballot position. The majority of the RSC members have indicated that they intend to support the standard. The issues precluding a consensus acceptance of the standard lie primarily in the thresholds identified in the standard as well as the data points to be used to calculate the GIC. NPCC is compiling comments and will submit them to NERC. The comments will be available shortly on the NPCC website at;

<https://www.npcc.org/Standards/Regional%20Standards%20Comments/Forms/Public%20List.aspx>

NPCC as the regional entity will cast an “Affirmative” vote and be submitting consensus comments to improve the standard.

Thanks,

Guy V. Zito
