Subject: NERC Ballot - 2014-02 - Critical Infrastructure Protection Standards Version 5 Revisions

Importance: High

NPCC Members and Entities of the NERC Registered Ballot Body,

The subject "final" ballot closes at 8pm, February 2, 2015. The Regional Standards Committee (RSC), in conjunction with the Task Force on Infrastructure Security and Technology (TFIST) have conducted a review of the posted materials. No issues precluding support of the posted materials have been identified. In the previous "additional" ballot, NPCC supported all the ballots however abstained on CIP-003 due to an issue regarding low impact electronic routable communication (LERC). In this previous ballot all posted material was approved with sufficient quorum of the ballot pool. This issue precluding NPCC's support has been clarified in supporting materials, therefore as the Regional Entity NPCC will be supporting all the individual ballots posted for this project and voting "**Affirmative**". If you have any questions please contact me.

Best Regards,

Guy V. Zito
