Subject: NERC Ballot-Project 2015-INT-01 Interpretation of CIP-002-5.1 for Energy Sector Security Consortium (EnergySec) | CIP-002-5.1
Date: Tuesday, September 6, 2016 9:35:26 AM

NPCC Members and Entities of the NERC Registered Ballot Body,

The NPCC Regional Standards Committee (RSC) in conjunction with the NPCC Task Force on Infrastructure Security and Technology (TFIST) reviewed the subject interpretation currently posted for an initial ballot through **8pm September 12, 2016**. The interpretation specifically requests clarification on what constitutes a “shared BES Cyber System”, how this is evaluated, determined, is impacted by multiple units, how they should be grouped, etc. More information may be found at: [RFI for Energy Sec](#)

The NPCC RSC, with input from TFIST, has reached a consensus and recommends an **“Affirmative”** ballot on the interpretation.

If you have any questions, please contact me.

Thank-you,

Guy V. Zito
