

**RCC Meeting
June 8, 2022
Agenda Item 9.11**

**Reliability Assessment Program
(NRAP)
HIGHLIGHT REPORT**
*Prepared for the
Reliability Coordinating Committee
June 8, 2022*

Distributed to:

Members, Reliability Coordinating Committee
Members, Compliance Committee
Members, Regional Standards Committee
Members, Task Force on System Studies
Members, Task Force on System Protection
Members, Task Force on Coordination of Planning
Members, Task Force on Coordination of Operation
Members, Task Force on Infrastructure Security and Technology
Chairmen, Working Groups
and
NPCC Staff

NPCC, Inc.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program Regional Standards Committee

| Item | Name | Assignment |
|------|------------------------------|---|
| RSC | Regional Standards Committee | <p>The NPCC Regional Standards Committee (RSC), a committee of the NPCC Board, is charged with management and maintenance of the NPCC Regional Standard Processes Manual (approved by FERC Dec. 23, 2014). The RSC considers requests for new or revised regional standards and be available for advisement to the NPCC Board of Directors on standards related matters. The RSC works in coordination with the Regional Standards Process Manager (RSPM) who is the administrator for the NPCC Regional Standard Processes Manual. In addition, the RSC reviews, comments on, and develops ballot recommendations for the NERC Reliability Standards under review or development. The RSC also provides oversight for the NPCC Regional Reliability Directories which contain NPCC’s more stringent regional Criteria and supporting procedures and guidelines. The RSC also conducts and coordinates the NPCC Cost Effectiveness Analysis Procedure (CEAP) for evaluation of the cost effectiveness of NPCC’s Regional Standards and Directories. The RSC provides input to the NERC “Periodic Review Projects” and the NERC version of the CEAP being referred to as cost effectiveness and is providing input into the “Standards Efficiency Review” (SER) project. The SER allows the industry the opportunity to identify potential standard requirements which could be candidates for retirement. The RSC also discusses potential avenues to address potential reliability related issues as well as opportunities to enhance reliability associated with the deployment of Distributed Energy Resources (DER). In addition, the RSC coordinates work with the RCC and CC to address any issues identified with standards to improve standards and reliability. The RSC also is sanctioned in the Compliance Guidance Policy process to vet potential approaches to compliance prior to submission to NERC and is engaged in revising the NPCC Regional Standard Processes Manual. The RSC will also serve as a liaison for the Northeast Region to the NERC RSTC for any Standards related recommendations.</p> |

Status/ Comments:

The RSC is focused on the review of each of the NERC Reliability Standards (as they are developed, revised, or reviewed for reaffirmation or retirement). The RSC is currently reviewing all the FERC Orders and NOPRs that pertain to Reliability Standards. The RSC develops recommendations for the membership on ballots when posted. The RSC also supports the NERC Standards Efficiency Review, Functional Model Working Group, NERC Standards Committee, and the NERC Standards Committee Process Subcommittee. The RSC is in the process of reviewing the NPCC Regional Reliability Standards Development Procedure, renamed the Regional Standard Processes Manual. The RSC continues to participate in the NERC Standard Processes Manual revisions and the Results Based Standards Initiative through its support of the Standards Committee Process Subcommittee and solicits members for the NERC drafting teams as necessary to ensure NPCC is adequately represented. The RSC has been overseeing the Strategic Review of NPCC Criteria.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Regional Standards Committee

| Item | Name | Assignment |
|-------------|------------------------------|---|
| RSC | Regional Standards Committee | <p>The RSC continues to consider enhancements to the NPCC Website to provide further uniformity and consistency with that of NERC and other Regions.</p> <p>Status/Comments: The RSC is currently engaged in reviewing a potential approach to penetration of utility-scale Distributed Energy Resources (DERs) on the distribution system, and adverse impact on the BES. The Distributed Energy Resource BES impact reporting form is posted on the NPCC website. The RSC hosted three DER forums in 2021 and one Offshore Wind forum. The DER, VER and Offshore Wind Forums are open to the public. The next DER Forum is tentatively scheduled for August 11, 2022. The DER Forums are hosted on the second day of RSC meetings. The goal is to host three DER Forums in 2022. The NPCC Standards staff developed Version 1 and 2 of the DER Guidance Document which was endorsed by the members of RSC in 2019 and 2020. All comments from the DER Guidance Document comment period were reviewed and responded to by the NPCC Standards staff and members of RSC. Version 3 of the NPCC DER Guidance Document was posted for comments at the end of 2021. The comment period ended on January 27, 2022. NPCC staff reviewed and responded to all the comments. The DER/VER Guidance Document V3 was reviewed and approved by the members of RSC at the May 11, 2022, RSC meeting. The goal is to add two new appendixes for version 4 on Electric Vehicle Charging and Building Electrification after the August 2022 DER/VER forum.</p> |

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Directories, Appendices & Criteria

| <u>Item</u> | <u>Name</u> | <u>Appendices</u> | <u>Lead TF</u> | <u>Current Version</u> |
|-------------|--|--|--|------------------------|
| DIR-1 | Basic Criteria for the Design And Operation of the Bulk Power System | Appendix A – ERO Standards Appendix B – Guidelines and Procedures for NPCC Area Transmission Review Appendix C – Procedure for Testing and Analysis of Extreme Contingencies Appendix D – Guidelines for Area Review of Resource Adequacy Appendix E – Guidelines for Requesting Exclusions to Sections 5.4.1 (B) and 5.5.1 (B) of NPCC Directory No. 1 Design and Operation of the Bulk Power System Appendix F – Procedure for Operational Planning Coordination Appendix G – Procedure for Inter Reliability Coordinator Area Voltage Control | TFCP TFCO* TFCO* | September 30, 2015 |

Status/ Comments:

The Task Force on Coordination of Planning (TFCP) and the Task Force on Coordination of Operation (TFCO) completed a collaborative review of Directory No. 1 in 2015. The NPCC Full Member committee approved the most recent version of Directory No. 1 on September 30, 2015.

Currently the RCC is monitoring an Implementation Plan governing protection upgrades in New England.

The TFCP has approved a Scope of Work, and a Joint Planning and Operations Working Group has begun the review of this document.

|-------------|-------------|--|----------------|------------------------|
| DIR-5 | Reserve | Appendix A – Monitoring Procedure for Operating Reserve Criteria Frequency Response | TFCO | September 27, 2019 |
| | | Appendix B – Procedures during Abnormal Operating Conditions | TFCO | |
| | | Appendix C – Participation Request Form – Simultaneous Activation of Reserve and ACE Diversity Interchange | TFCO | |
| | | Appendix D – Guidelines for Determining the Time T+0 | TFCO | |

Status/ Comments:

The Task Force on Coordination of Operation (TFCO) completed a comprehensive review of Directory No. 5 in 2019 with the NPCC Full Membership approving the revised version of Directory No.5 on September 27, 2019. The review considered the impact of evolving ERO standards, NPCC Glossary updates and revisions, revised synchronized reserve criteria, and retired procedures detailed within the Appendices.

Errata corrections to Requirement 4.3, Attachments B - C, and Appendix C were incorporated in January and April 2020.

In February 2022, the TFCO received an NPCC Request for Clarification of Criteria on sustainability requirements upon the activation of reserves with respect to Hybrid Storage Resources and Directory No. 5, R6. The TFCO and CO-1 developed a response to the clarification request, which was posted to the NPCC Open Process in May 2022 for a 45-day Comment Period. Subsequent to TFCO’s consideration of comments received, the final Clarification will be presented to the Reliability Coordinating Committee (RCC) for approval. The next triennial review of Directory No.5 has been added to the RCC approved 2023 TFCO Work Plan.

| DIR-6 | Regional Reserve Sharing | | TFCO | September 27, 2019 |

Status/Comments:

The Task Force on Coordination of Operation (TFCO) and its CO-8 Working Group completed a comprehensive review of Directory No. 6 and posted a revised version of the document to the NPCC Open Process. The TFCO review considered the impact of evolving ERO standards, emerging industry technologies and the recommendations contained in the Phase 2 Final Report on the A-10 Methodology. An updated version of Directory No. 6 was approved by the RCC for approval at its September 4, 2019 meeting. The NPCC Full Membership approved the revised version of Directory No.6 on September 27, 2019.

| <u>Item</u> | <u>Name</u> | <u>Appendices</u> | <u>Lead TF</u> | <u>Current Version</u> |
|-------------|-------------------------|-------------------|----------------|------------------------|
| DIR-7 | Remedial Action Schemes | | TFCP | Dec. 22, 2020 |

Attachment 1 – Definition of Terms
 Appendix A – Guidance for Consideration in Remedial Action Scheme TFSP
 Criteria
 Appendix B – Procedure for Review of

Remedial Action Schemes

Status/ Comments:

The Task Force on Coordination of Planning (TFCP) and the Task Force on System Protection (TFSP) completed a comprehensive review of Directory No. 7 to ensure that the existing regional review process and the specific criteria attributes within the document are consistent with PRC-012-2. The title of the document and the existing NPCC Glossary term for Special Protection Systems was revised to be consistent with NERC’s Glossary term for Remedial Action Scheme. The RCC recommended the NPCC Full Member Committee approval of these changes at its December 1, 2020 meeting. The NPCC Full Membership approved the revised version of Directory No.7 on December 22, 2020.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Directories, Appendices & Criteria

| <u>Item</u> | <u>Name</u> | <u>Appendices</u> | <u>Lead TF</u> | <u>Current Version</u> |
|-------------|--------------------------|---|----------------|------------------------|
| DIR-8 | System Restoration | <p>Appendix A - Table 1 “Standard Test Procedures for key facilities and associated critical components required for system restoration.</p> <p>Appendix B: NERC ERO Reliability Standards</p> <p>Appendix C - Table 2: Comparison of Test Procedures for Critical Components of Key Facilities of the System Restoration Plan</p> | TFCO | September 25, 2018 |
| | Status/ Comments: | <p>The Directory No. 8 Triennial Review Team, consisting of CO-11 Working Group members and NPCC Transmission Operator representatives, conducted focused review sessions of Directory No. 8 every three weeks in 2021 and 2022. The review addressed non-substantive, deferred NPCC member comments from the previous triennial review (2018), test procedures for Critical Components, RCC-approved Criteria Clarification Requests, and proposed new testing procedural language for better alignment between the requirements and current system and computer technologies. Through the Task Force on Coordination of Operation (TFCO), the Task Force on System Protection (TFSP) was also requested to review Testing Procedures in Directory No. 8 to ensure the criteria remains more specific and stringent to recent changes made to PRC-005.</p> <p>In accordance with the NPCC Directory Development and Revision Manual, a Cost Effectiveness Analysis (CEA) review was also completed to describe enhanced reliability attributes and resilience components of the criteria. The CEA will seek NPCC member comment to identify if there are any potential alternatives achieving the same reliability outcome.</p> <p>TFCO reviewed the proposed Directory redlines, NPCC Glossary of Terms Changes and CEA at its January 12-13, 2022 meeting and approved an NPCC Open Process Posting on May 12, 2022. The approved materials will be posted to the NPCC Open Process in June 2022 for a 45-day Comment Period. Subsequent to TFCO’s eventual consideration of comments received, the final revisions will be presented to the RCC for approval.</p> | | |

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Directories, Appendices & Criteria

| Item | Name | Appendices | Lead TF | Current Version |
|-------|--|---|--|----------------------|
| DIR-9 | NPCC Verification of Generator Gross and Net Real Power Capability | Appendix A – Definition of Terms Appendix B – Basic Flow Chart for Verification of Generator Gross and Net Real Power Capability | TFCO TFCO/TFCP ¹ TFCO/TFCP ¹ | Retired July 1, 2019 |

Status/ Comments:

The NPCC Full Membership voted to approve the retirement of NPCC Regional Reliability Directory No. 9 *Verification of Real Power Capability*, and seven existing NPCC Glossary terms contained solely within Directories No. 9 and No. 10, effective July 1, 2019. Directory No. 9 is posted on the NPCC website marked with a ‘retired’ watermark.

| Item | Name | Appendices | Lead TF | Current Version |
|--------|--|--|--|----------------------|
| DIR-10 | NPCC Verification of Generator Gross and Net Reactive Power Capability | Appendix A – Definition of Terms Appendix B1 – Basic Flow Chart for Verification of Generator Gross and Net Reactive Power Capability Appendix B2 – Generator Reactive Capability Form | TFCO TFCO/TFCP ¹ TFCO/TFCP ¹ TFCO/TFCP ¹ | Retired July 1, 2019 |

Status/ Comments:

The Task Force on Coordination of Operation has completed a technical comparison of the Directory No. 10 criteria with the requirements of MOD-25-2 and concluded that Directory No. 10 can be retired without creating a reliability gap. On August 3, 2017, the NPCC Full Member Committee voted to approve the retirement of NPCC Regional Reliability Directory No. 10 *Verification of Reactive Power Capability*, and seven existing NPCC Glossary terms contained solely within Directories No. 9 and No.10, effective July 1, 2019. Directory No. 10 is posted on the NPCC website marked with a ‘retired’ watermark.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Directories, Appendices & Criteria

| <u>Item</u> | <u>Name</u> | <u>Appendices</u> | <u>Lead TF</u> | <u>Current Version</u> |
|-------------|---|--|----------------|------------------------|
| DIR-11 | Disturbance Monitoring Equipment Criteria | | TFSP | October 24, 2016 |
| | | Appendix A – Guide to Time Synchronization of Substation Equipment | TFSP | |
| | | Appendix B – Guide for Application of DME | TFSP | |
| | | Appendix C – Guide for Generator Sequence of Events Monitoring | TFSP | |

Status/ Comments:

On October 24, 2016 the NPCC Full Member Committee voted to approve regional Reliability Directory No. 11 *Disturbance Monitoring Equipment Criteria*. Also approved was the concurrent retirement of the following NPCC documents:

- A-15 – “*Disturbance Monitoring Criteria*”
- B-25 – “*Guide to Time Synchronization of Substation Equipment*”
- B-26 – “*Guide for Application Disturbance Monitoring Equipment*”
- B-28 – “*Guide for Generator Sequence of Events Monitoring*”

Directory No. 11 augments PRC-002-2 *Disturbance Monitoring and Reporting Requirements* and guides effective application of equipment necessary to capture the data required by the NERC standard.

The Task Force on System Protection has completed its periodic review of Directory No.11 and the revised and updated document is on the November 30, 2021 RCC Agenda for approval.

|-------------|---|----------------------------------|----------------|------------------------|
| DIR-12 | UFLS Load Shedding Program Requirements | Appendix A – Definition of Terms | TFSS TFSS | Retired Oct. 1, 2021 |

Status/ Comments:

The Task Force on System Studies (TFSS) posted a retirement recommendation for Directory No. 12 on April 28, 2021 for a 45- day comment period. The TFSS has recommended that Directory No. 12 can be retired effective October 1, 2021 to coincide with the enforcement date of PRC –006-NPCC –02 in all jurisdictions. On October 19, 2021 the NPCC Full Member Committee voted to approve the retirement of Directory No. 12 effective October 1, 2021.

| <u>Item</u> | <u>Name</u> | <u>Criteria</u> | <u>Lead TF</u> | <u>Current Version</u> |
|-------------|---|-----------------|----------------|------------------------|
| A-01 | Criteria for Review and Approval of Documents | | TFCP | Retired Sept. 25, 2018 |

Status/ Comments:

The Regional Standards Committee (RSC) updated the NPCC *Directory Development and Revision Manual*, and relevant sections of the A-01 *Criteria for Review and Approval of Documents* have been incorporated into the Directory Manual for the purposes of retiring the A-01. The revised and updated NPCC Directory Manual, including sections of the A-01 document, was approved by the RSC in August 2018. Concurrent with the RSC review of the revised Directory Manual, the RCC approved the retirement of the A-01 document and on September 25, 2018 the NPCC Full Membership approved the retirement of the A-01 Document.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Directories, Appendices & Criteria

| <u>Item</u> | <u>Name</u> | <u>Criteria</u> | <u>Lead TF</u> | <u>Current Version</u> |
|-------------|--|-----------------|----------------|------------------------|
| A-10 | Classification of Bulk Power System Elements | | TFCP | March 27, 2020 |

Status/ Comments:

The Task Force on Coordination of Planning (TFCP) and its CP-11 Working Group conducted a review of the A-10 methodology. The CP-11 Working Group effort focused on three objectives as highlighted by the TFCP in the project scope: 1) Identify critical facilities for the applicability of NPCC Directories; 2) improve consistency of application and outcome across the region; and 3) simplify the methodology to make it less resource intensive.

The RCC approved testing of three proposed methodologies developed by the CP-11 Working Group during Phase I of the review in 2017. These proposals included revisions to the existing methodology and two new methodologies. The CP-11 Working Group Final Report concluded that a revised and improved existing methodology is the most effective of the proposals in identifying those facilities critical to the design and operation of the BPS. The recommended improvements include revisions to the overall testing strategy (i.e., where to begin and conclude testing), base case set-up (i.e., load levels, interface stress and generation patterns) and the use of performance requirements to assess testing outcomes. The RCC approved the CP-11 Working Group's recommendations in December of 2018 and these recommendations have been incorporated into a revised version of the A-10 Document.

The TFCP posted a revised version of the A-10 to the Open Process for two Open Process comment periods and the TFCP has responded to all comments. The RCC approved the revised A-10 Document and an associated implementation plan at its February 27, 2020 meeting. The NPCC Full Member Committee voted to approve the revised A-10 Document on March 27, 2020.

Regional Standards

| <u>Item</u> | <u>Name</u> | <u>Assignment</u> | <u>Current Version</u> | |
|-----------------|------------------------|--|------------------------|------------------------|
| PRC-002-NPCC-01 | Disturbance Monitoring | This Standard establishes the technical and reporting requirements for disturbance monitoring equipment. This will lead to improved system reliability by providing the resources to do post event analyses. | Latest Version: | Retired |
| | | | Date: | August 16, 2016 |

Status/ Comments:

The proposal to retire PRC-002-NPCC-01 *Disturbance Monitoring* regional standard was approved by the NPCC Board on March 23, 2016 and by the NERC Board of Trustees on May 5, 2016. After NERC Board approval, a petition to retire the regional standard was filed with FERC on June 9, 2016 and it was filed with all Canadian Provinces on June 14, 2016.

FERC issued an approval letter for the retirement of Regional Reliability Standard PRC-002-NPCC-01 *Disturbance Monitoring* on August 16, 2016.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Regional Standards

| Item | Name | Assignment | Current Version | |
|-------------------|---|--|------------------------------|------------------|
| PRC-006 NPCC-1 | Under Frequency Load Shedding (UFLS) | This Standard will provide the requirements for implementing an automatic under frequency load shedding program to effectively respond to system under frequency events. | Latest Version: | Feb. 2020 |
| | | | Frequency of Reviews: | 3 years |
| | | | Next Review Date: | Feb. 2023 |

Status/ Comments:

FERC approved PRC-006-NPCC-1 and its Implementation Plan on February 21, 2013. Based on the FERC approved Implementation Plan the enforcement date for requirements R1 – R7 is January 1, 2016. Requirements R8 – R23 became on enforceable on July 1, 2015.

As a result of developments regarding NERC PRC-006-1/PRC-006-2 *Automatic Underfrequency Load Shedding*, PRC-024-1/PRC-024-2 *Generator Frequency and Voltage Protective Relay Settings*, Project 2014-01 *Standards Applicability for Dispersed Generation Resources*, NPCC Directory No. 12 *Underfrequency Load Shedding Program Requirements*, and the 2013 *NPCC UFLS Adequacy Assessment*, a Regional Standard Authorization Request (RSAR) for revision of Automatic Underfrequency Load Shedding PRC-006-NPCC-1 was approved by the Regional Standards Committee at its June 23, 2015 meeting. The RCC approved the Regional Standards Committee’s request to assign the TFSS to the project scope outlined in the RSAR and to populate the Drafting Team. On October 7, 2015, the RSC approved the drafting team roster as per the recommendation of the TFSS leadership. The PRC-006-NPCC-01 Automatic UFLS drafting team met eleven times and three conference calls. All requirements have been reviewed by the SDT and the draft standard was posted for three open process comment periods and for a 90-day pre-ballot review. A ballot was then conducted which closed on February 10, 2019. The ballot achieved 80.95% quorum and approval of 76%. Due to an ERRATA, the standard was re-approved by the NPCC Board at their September 5, 2019 meeting. It was approved at the November 5, 2019 BOT meeting. The petition for approval is sent to FERC on December 23, 2019 and FERC has assigned Docket RD20-1-000 open for comment period which closed on January 22, 2020. The PRC-006-NPCC-02 was endorsed by FERC on February 18, 2020.

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Regional Standards

| Item | Name | Assignment | Current Version | |
|---------------------|--|--|------------------------------|----------------|
| BAL-002- NPCC-01 | Regional Reserve Sharing Groups | The Standard provides the measures for implementing Reserve Sharing Groups within NPCC to meet their reserve obligations. | Latest Version: | New |
| | | | Frequency of Reviews: | 3 years |
| | | | Next Review Date: | |
| | Status/ Comments: | A Regional Standard Authorization Request (RSAR) has been developed and approved by the RSC. The RCC has assigned the Task Force on Coordination of Operation (TFCO) to act as the drafting team and a request for drafting team members was sent to the NPCC membership. At its meeting of April 14 and 15, 2011, the TFCO established a sub-group of TFCO members and NPCC staff that will work on the Reserve Sharing Groups Standard's development. The development of Regional Standards has been held in abeyance pending further direction from NERC. | | |

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Standards Program

Regional Standards Development Procedure

| <u>Item</u> | <u>Name</u> | <u>Assignment</u> | <u>Current Version</u> |
|-------------|--------------------------|--|---|
| RSPM | Regional Standard | The NPCC Regional Standard Processes Manual describes the procedures, policies, and practices implemented to ensure an “open, fair, and inclusive” process for the transparent initiation, development, implementation and revision of the NPCC Regional Standards necessary for the reliable operation of the Interconnected Bulk Power System in northeastern North America. | <p>Latest Version: Nov. 2020</p> <p>Frequency of Reviews: 3 years</p> <p>Next Review Date: Nov. 2023</p> |
| | Status/ Comments: | <p>The Regional Standard Processes Manual (RSPM) is posted on the NPCC Website. The RSC actively reviewed the activities at the NERC level to ensure the regional procedure is consistent with the NERC Standard Processes Manual and achieves a consistency with the NERC common attributes adhered to by the other Regions. During the June 20, 2018 RSC meeting, a small team was formed to review the current RSPM for any potential updates. The RSC reviewed and updated the existing RSPM. The revised RSPM was approved by the RSC for comment posting on August 7, 2019. The RSPM was posted for a 45-day comment period from September 11, 2019 to October 26, 2019. The RSPM was posted for a ballot period from January 17, 2020 to February 25, 2020. The results of the ballot were as follows: 81.65% quorum and 100% approval. The RSPM was approved by the NPCC Board at their meeting on May 6, 2020.</p> <p>The NPCC RSPM was posted by NERC for a 45-day industry wide comment period that concluded on July 29, 2020. The proposal to approve Regional Standard Processes Manual was submitted to the NERC Board of Trustees and approved at their August 19-20, 2020 meeting. NERC and NPCC filed the joint petition to FERC on September 10, 2020. On November 23, 2020, FERC issued a letter order endorsing the revised NPCC Regional Standard Processes Manual. Docket Number: RR20-7-000.</p> | |

Compliance Committee

| Item | Name | Assignment |
|-------------|---------------------------|---|
| CC | NPCC Compliance Committee | <p>The NPCC Compliance Committee provides objective stakeholder input for Staff consideration in the implementation of the NPCC Compliance Monitoring and Enforcement Program (CMEP). The NPCC CMEP covers compliance assessment and enforcement of NERC Reliability Standards and NPCC Regional Reliability Standards. As part of its role, the CC will endorse the compliance procedures (CP) used by the NPCC Compliance Staff in the conduct of the CMEP. In addition, the CC is responsible for reviewing Directory certification forms and providing non-monetary sanction recommendations to the RCC for incidents of non-compliance with aspects of monitored Reliability Criteria.</p> <p>Status/ Comments: At the January 13, 2021 meeting, the 2021 CC Scope and CC Work Plan were discussed and approved. Both documents were approved by the NPCC Board on January 27, 2021. On the January through May 2021 CC calls, NPCC Staff shared with the CC updates and explanations on the transition from the CDAA compliance reporting tool to the new ERO compliance tool, which will occur through 3 Releases in 2021. The new tools are Align and the Secure Evidence Locker. A prioritized Align/SEL training plan for stakeholder users was developed by NPCC Staff and accepted by the CC on March 17, 2021. The CC was presented with the draft NPCC criteria for incorporating entity Performance Considerations in the development of Compliance Oversight Plans (COPs). Due to CC questions, a small working group was set-up to review the criteria in an objective fashion to propose updates at the May 26, 2021 CC meeting where the revised PC Criteria was accepted by the CC. NPCC status and progress on the implementation of the new Align/SEL tool, including stakeholder training were presented to the CC at each monthly meeting in 2021.</p> |

|-------------|--|--|
| CCEP | Criteria Compliance and Enforcement Program | <p>The CC will maintain the <i>NPCC Criteria Compliance and Enforcement Program Process Document (CCEP-1)</i> which documents the process for actively monitoring and enforcing compliance on a subset of the Reliability Criteria.</p> <p>The Compliance Committee provides the RCC an annual CCEP Implementation Plan for approval which identifies the Reliability Criteria that will be monitored in the upcoming CCEP compliance year and identifies the due dates for the Reliability Criteria Certification forms. The Compliance Committee also provides the RCC an annual written assessment of the submitted Reliability Criteria Certification forms for approval which includes recommendations as necessary of non-monetary sanctions for incidents of non-compliance.</p> <p>Status/ Comments:</p> <p>The CCEP Working Group has updated the CCEP-1 process document and it was presented and endorsed by the CC on April 22, 2020. It was provided to the RCC and posted on the NPCC website. In addition, the CC provided a recommendation to the RCC on April 23, 2020 on how issues with Full Member Directory noncompliance due to COVID response should be documented. On July 15, 2020 the CC developed and endorsed the 2019 CCEP Assessment Report which was presented for acceptance at the September 9, 2020 RCC meeting. The 2021 CCEP Implementation Plan and the blank forms for the 2021 Implementation Plan (IP) were approved at the September 16, 2020 CC meeting. The 2021 CCEP IP was accepted at the December 1, 2020 RCC meeting. The last of the CCEP certification forms for the 2020 CCEP year were due on May 20, 2021. The CC developed the 2021 CCEP Assessment Report in time for discussion at the July which was then presented (and accepted by) to the RCC on September 8, 2021. The 2022 CCEP Implementation Plan will be presented at the November 30, 2021 RCC meeting. In October 2021, a Directory No. 8 draft certification form for TOs to certify to Key Facility testing under the 2023 CCEP Implementation Plan was shared by the CC Chair with Task Force on Coordination of Operation.</p> |

Training, Education, and Operator Certification Program

TASK FORCE ON COORDINATION OF OPERATION

| Item | Name | Assignment |
|------|----------------------------------|---|
| CO-2 | System Operator Training Seminar | <p>This Working Group establishes a program for system operator training relating to NPCC Inc. inter-Area matters, Working Group criteria, terminology, policies, and operating instructions. It prepares and presents material at system operator training sessions, exchanges information on internal system operator training methods. The CO-2 Working Group also evaluates and proposes new techniques and training aids as they become available.</p> |
| | Status/ Comments: | <p>The CO-2 WG held a meeting on March 8-9, 2022 to plan the Spring 2022, 88th NPCC System Operator seminar. The Seminar was held virtually on May 18, 2022 with approximately 40 participants and speakers. Consistent with past practice, system operator feedback from the 2021 Fall 87th NPCC System Operator Seminar was used to develop the program agenda and topics, in coordination with the CO-8 Working Group. The seminar will include topics related to Human Performance Improvement, Situational Awareness, Geomagnetic Disturbances, Cyber Security and Islanded Operations and Frequency Control.</p> <p>The Fall 2022, 89th NPCC System Operator Seminar will be held in Saratoga Springs, NY on November 1-3, 2022, with a planning meeting at the NYISO on September 7-8, 2022.</p> <p>The CO-2 Working Group members continue to discuss and make enhancements to their respective training programs, monitor System Operator Credential Maintenance under pandemic related restrictions, and share lessons learned to provide system operators with the necessary Continuing Education Hours and safe training opportunities to support reliable system operations during COVID-19 pandemic protocols.</p> |

TASK FORCE ON COORDINATION OF OPERATION

| Item | Name | Assignment |
|-------------|--|---|
| CO-1 | Control Performance Working Group | <p>The Working Group ensures coordination between adjacent control areas in establishing interchange schedules, reviews time error correction procedures, and monitors the conformance of the Areas with NPCC Control Performance Criteria and Operating Reserve Criteria. At the request of the Task Force on Coordination of Operation (TFCO), it conducts investigations of control performance problems.</p> |
| | Status/ Comments: | <p>The CO-1 Working Group met most recently on April 27 – 28, 2022 and will meet next on August 3-4, 2022. The Working Group most recently developed a response to an NPCC Request for Clarification of Criteria in conjunction with the TFCO. The response addresses sustainability requirements upon the activation of reserves with respect to Hybrid Storage Resources and Directory #5, R6 and was posted to the NPCC Open Process in May 2022 for a 45-day Comment Period. Subsequent to TFCO’s consideration of comments received, the final Clarification will be presented to the Reliability Coordinating Committee (RCC) for approval.</p> |
| | | <p>The CO-1 Working Group continues to conduct periodic monitoring as required by NERC and NPCC Control Performance and Reserve Criteria, in coordination with the CO-8 Working Group and the TFCO. No discernable operational trends have been identified. In addition to the regular periodic Control Performance monitoring activities, the CO-1 Working Group continues to closely follow the activities of the BAL-003.1 Phase II Standards Drafting Team and the NERC Resources Subcommittee. The Working Group continues to hold VER-integration discussions with regards to potential enhancements to applicable Directory No.5 criteria, at the request of the TFCO.</p> |

| CO-8 | System Operations Managers Working Group | <p>Provide a forum for the Managers of the NPCC control centers to identify and discuss security concerns in the operation of the interconnected bulk power supply system, and specific concerns related to the integration of operation between and among the evolving ISOs. The System Operations Managers Working Group will also assist the Task Force on Coordination of Operation (TFCO) in their work on issues related to system security and the operation of the ISOs, and provide advice to the TFCO, as requested.</p> <p>Status/ Comments:</p> <p>At its May 4-5, 2022 meeting the CO-8 Working Group members, including representation from PJM reviewed Areas' Spring 2022 operations and Summer 2022 preparations to date, as well as status of Covid-19 pandemic related operations activities and de-escalation plans. The CO-8 WG discussed and developed a recommendation for TFCO's consideration for the review of the Directory No. 2, as part of TFCO's 2022-23 Work Plan to conduct a comprehensive triennial review.</p> <p>The Working Group also reviewed the NERC GridEx VI report and developed a response to the TFCO on an assignment to review findings and recommendation from the FERC and ERO Enterprise Joint Report on Real-time Assessments. The CO-8 Working Group also discussed CO-2 WG plans for the in-person Fall 2022 NPCC System Operator Seminar.</p> <p>The CO-8 Working Group has ended weekly Emergency Preparedness calls to discuss pandemic operations and any anticipated system operations challenges. Emergency Preparedness calls are being held on an as needed basis. As of June 6, 2022 the NPCC Emergency Preparedness Conference Call procedure was used by the System Operation Managers 16 times thus far during 2022.</p> |

|-------|---------------------------|--|
| CO-11 | Restoration Working Group | <p>The CO-11 Restoration Working Group facilitates effective and coordinated power system restoration among the NPCC Reliability Coordinator areas, and with adjacent Regions. It annually reviews the restoration plans of the NPCC Reliability Coordinator areas to identify in each individual plan the physical points requiring coordination, the general elements of the restoration plan, the Key Facilities associated with the restoration plan, the communication protocols employed, and the roles and responsibilities of the restoration participants. It identifies opportunities for mutual assistance during restoration and the extent to which each system can rely on its neighbors for assistance, and coordinates Reliability Coordinator restoration exercises and develops and supervises annual wide-area restoration drills. The CO-11 working Group monitors the NERC Reliability Standards EOP-005, <i>System Restoration from Blackstart Resources</i>, and EOP-006, <i>System Restoration Coordination</i>. The CO-11 Working Group provides comments to the NPCC Task Force on Coordination of Operation and the NPCC Regional Standards Committee as revisions to these Standards are posted for consideration and weighed for implementation.</p> |
| | Status/ Comments: | <p>The CO-11 Working Group most recently on April 4, 2022 and will meet next on June 29, 2022. In accordance with the WG Scope, the Quebec Area Restoration Plan was reviewed by the WG, which verified that all items on the CO-11 Restoration Plan Checklist were sufficiently addressed.</p> <p>The CO-11 Working Group and TOP representatives have met on a three-week basis throughout 2021 and in 2022 to complete the triennial review of Directory No. 8. Proposed redlines, changes to the NPCC Glossary of Terms and a Cost Effectiveness Analysis were approved for a 45-day Open Process Posting by the Task Force on Coordination of Operation (TFCO) at its May 11-12, 2022 meeting. Subsequent to TFCO’s eventual consideration of comments received, the final revisions will be presented to the RCC for approval.</p> <p>The CO-11 Working Group also reviewed feedback from the 2021 NPCC Wide Area RC-to-RC Restoration Exercise, which was held virtually on October 20, 2021 with 35 participants and operators from all five NPCC Reliability Coordinators. A follow-up report summarizing the exercise was developed and shared with the TFCO and CO-8 at their respective meetings in Q1-2022. Findings from the report are being used for planning the 2022 NPCC Wide Area RC-to-RC Restoration Exercise, scheduled for October 19, 2022.</p> |

TASK FORCE ON COORDINATION OF OPERATION

| Item | Name | Assignment |
|-------------|--|--|
| CO-12 | Operations Planning Working Group | Review the overall reliability of the generation and transmission system in the NPCC Region for the Summer and Winter Seasonal conditions. |
| | Status/ Comments: | <p>The CO-12 working group held their kickoff meeting for the 2022 NPCC Summer Reliability Assessment on January 28, 2022 and has coordinated activities with the CP-8 Working Group. At the direction of the Coordination of Operation (TFCO), the CO-12 Working Group worked with the CP-8 WG to develop enhancements and sensitivities to the summer assessment forecast to account for abnormal weather conditions. Preliminary findings on the assessment were presented to the RCC, TFCO and TFCP at their respective meetings in March and April 2022. The final assessment was approved by the Task Forces on April 22, 2022 and a presentation by NPCC staff was given to the NPCC Board of Directors on May 4, 2022. The final 2022 NPCC Summer Reliability Assessment and Summary Report was released on May 5, 2022.</p> <p>The CO-12 Working Group also coordinated input on the 2022 NERC Summer Reliability Assessment (SRA) in conjunction with the NPCC Working Group. The request was received in January 2022 and was reviewed by the NERC Reliability Assessment Subcommittee at their April 13 – 14, 2022 meeting. Efforts were made to ensure alignment of the 2022 NERC SRA with the 2022 NPCC Summer Reliability Assessment. The 2022 NERC SRA was released on May 18, 2022.</p> |

| CO-14 | Operations Load Forecast Working Group | Promote information sharing among NPCC Reliability Coordinators, Balancing Authorities and Transmission Operators in producing accurate and timely load forecast products. CO-14 reports to the NPCC Task Force on Coordination of Operation (TFCO). Regular meetings occur twice per year by teleconference or in-person. Meetings are hosted by NPCC member organizations with an open invitation to PJM and MISO Operations Load Forecasters. |
| | Status/ Comments: | The CO-14 working group members conducted their first formal meeting on October 27, 2021 virtually via WebEx. The members held discussions on the impacts of load forecasts on downstream processes, sharing best practices in operations load forecast processes, current societal and market trends affecting load and their impacts on load forecasting, and sharing metrics for load forecast accuracy, including the foundations for which those metrics are selected, calculated, and their overall performance in reference to those metrics. The CO-14 working group most recently met on March 23-24, 2022 for a virtual meeting and are anticipating conducting their next meeting on September 21-22, 2022. |

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Assessment and Performance Analysis Program TASK FORCE ON COORDINATION OF PLANNING

| Item | Name | Assignment |
|--------------|---|---|
| CP- 8 | Working Group on Review of Resource and Transmission Adequacy | Review the overall reliability of the NPCC Areas and perform pre-seasonal resource adequacy assessments. |
| | Status/ Comments: | The CP-8 Working Group completed the <i>NPCC 2021 Long Range Adequacy Overview</i> ; the RCC approved the report at its November 30, 2021 meeting. |
| Item | Name | Assignment |
| CP- 2022S | Summer 2022 Multi-Area Probabilistic Reliability Assessment | Assess NPCC Area reliability by estimating the projected use of Area Operating Procedures designed to mitigate resource shortages for the summer (May through September) period. |
| | Status/ Comments: | The assessment was approved by the Task Forces on April 22, 2022; a presentation was given to the NPCC Board of Directors on May 4, 2022. The <i>2022 NPCC Summer Reliability Assessment</i> was released on May 5, 2022. |
| Item | Name | Assignment |
| CP- 2021-22W | Winter 2021-2022 Multi-Area Probabilistic Reliability Assessment | Assess NPCC Area reliability by estimating projected use of Area Operating Procedures designed to mitigate resource shortages for the winter (November through March) period. |
| | Status/ Comments: | The CP-8 Working Group completed the NPCC Winter 2021-2022 Multi-Area Probabilistic Assessment; the assessment was approved by the RCC at their November 30, 2021 meeting. |

TASK FORCE ON SYSTEM STUDIES

| Item | Name | Assignment |
|-------|--|--|
| SS-37 | Base Case Development Working Group Status/ Comments: | <p>On an annual basis, develop a library of solved power flow cases and associated dynamic data.</p> <p>MMWG 2021 Power Flow Cases In October the MMWG finalized the twelve (12) 2021 Series power flow cases. The SS-37 Working group commenced case development activities in April and continued to update the power flow cases through the various trials throughout the year leading up to the October approval. The SS-37 Working Group also developed an additional 2026 Spring Light Load case on the recommendation of the Task Force on System Studies. Working Group members held a meeting on June 2, 2022 to develop the 2022 Series power flow cases for submission to the MMWG Coordinator.</p> <p>MMWG 2021 Dynamic Cases The SS-37 Working Group submitted the initial dynamics case data package to the MMWG Coordinator in August and will continue to address dynamic case issues as they arise throughout the trials conducted by the MMWG Coordinator. Providing Composite Load Model Data (CMLD) for all eight (8) dynamics cases is required by the MMWG for the 2021 series; SS-37 members are working to meet this requirement.</p> <p>Automation Sub-Group The SS-37 Automation Sub-Group continues to develop tools to make the power flow and dynamic case building process more efficient. Prioritizing the power flow build as that is the first major build for SS-37 Working Group. The power flow and dynamics text recognition tool is currently under a testing process to find operational bugs and provide feedback for the developers.</p> <p>Short Circuit Sub-Group The SS-37 Short Circuit Sub-Group held a meeting on April 13, 2022 to review results from the October 2021 comparison exercise and plan for the next boundary bus calculation comparison in the Fall. The group determined that it will be beneficial to invite software vendors to provide webinars detailing the capabilities of their products. Plans are underway for presentations by Siemens and ASPEN.</p> |

| SS-38 | Inter-Area Dynamic Analysis Working Group | Assigned to analyze dynamic phenomena, which may affect interconnected system reliability, especially in the area of low frequency oscillations. |
| | Status/ Comments: | The SS 38 Working Group met in April and May 2022 and developed the draft Terms of Reference for the Under Frequency Load Shedding (UFLS) Adequacy Assessment for review with Task Force on System Studies. The Working Group will conduct an additional assessment related to increasing levels of DER on individual distribution feeders where blocks of UFLS are tripped within the UFLS program. The UFLS is expected to be completed by the end of 2023. |

RELIABILITY ASSESSMENT PROGRAM HIGHLIGHTS

Reliability Assessment and Performance Analysis Program

TASK FORCE ON SYSTEM STUDIES

| Item | Name | Assignment |
|-------------|---------------------------------------|---|
| SS-39 | Geomagnetic Disturbance Working Group | Develop a White Paper recommending voluntary guidelines to address R3, R4, and R8 of NERC Standard TPL-007-4. |

Status/ Comments:

The objectives of the Working Group are to share lessons learned as the first geomagnetic disturbance vulnerability assessment is undertaken, adopt a continuous improvement process for future GMD efforts, and update the whitepaper developed in 2021 recommending voluntary guidelines for meeting Requirement R3 and developing methodologies among NPCC members for performing the GMD Benchmark (R4) and Supplemental (R8) GMD Vulnerability Assessments as required by NERC Standard TPL-007-4.

On April 7, 2022, EPRI staff made a presentation to working group members on the capabilities of a software tool designed to model GICs and GIC-related harmonics. This specialized tool has extensive capabilities that can supplement GIC analysis from tools like PSSE, including modeling transformer saturation, although it requires greater data to produce accurate results, including sequence data. It is undergoing continual development and testing and is expected to provide substantial value in future years, although for entities that are required to complete vulnerability assessments in 2022, use may be limited at present. It was also noted that the expected upswing in solar activity (which cause GMDs) should provide ample data for model validation over the next few years.

On May 20, 2022, Natural Resources Canada (NRCAN) made provided presentations on the topic of assessing geomagnetic hazards to power systems, including substantial practical information on calculating geoelectric field data from available magnetometer data, which will inform future efforts to validate GIC models. Existing sources of geomagnetic and geoelectric data available on the NRCAN website and how it can be retrieved for analysis was also presented.

TASK FORCE ON SYSTEM PROTECTION

| Item | Name | Assignment |
|-------------|---|--|
| SP-7 | Working Group on Review Of Protection System Misoperations | Review and analyze misoperations of transmission and generation protection systems and special protection systems on the bulk electric system and report on the statistics of misoperations as they occur in the NPCC region including lessons learned and implementation of corrective action plans by registered entities. |
| | Status/ Comments: | <p>The Task Force on System Protection reviewed the status of SP-7 Working Group on Protection System Misoperation Review as completed through Q4 of 2021. The total number of misoperations for Q4 2021 is 32 compared to the NPCC Q4 quarterly average of 36 misoperations. This is the lowest misoperation reported for the Q4 in the past five years.</p> <p>The misoperation rate for Q4 2021 is 12.55%. This is the second highest misoperation rate reported for the past five years in Q4. The cumulative misoperation rate as of 2017 is 8.13%.</p> <p>Note that during this quarter, only 255 operations were reported compared to the Q2 quarterly average of 332 operations. This is the lowest number of operations that were reported for all the past quarters.</p> |

| TADSUG | Transmission Availability Data System | <p>Serve as the Regional Entity Coordinator in support of the NERC TADS outage data collection and the analysis of the NPCC Transmission Owners (TO) outage information. Oversee the use of and the data entry of automatic outage information by the TO in the NERC Internet based data management tool - webTADS.</p> <p>Status/ Comments:</p> <p>The User Group holds monthly calls; the last one was conducted on May 17, 2022. The TADS User Group worked on the Data Reporting Instructions (DRI) for TADS. The 2022 DRI is now on the TADS website.</p> <p>NERC conducted a training on November 9, 2021. The training was comprised of ten modules. The modules were background, data entry demo, checklist completion, in service state / TADS reportable, outage types, cause codes, fault types, outage modes, outage ID and event ID Codes and examples to cause code. Training is intended for all members of industry with roles relating to TADS. Examples of roles include data gathering, data entry, and data quality reviews. Benefits of attending include learning the essentials of cause coding transmission outages as well as learning effective methods for avoiding common hurdles and best practices for TADS reporting. The training material/WebEx recording will be posted on the NERC's TADS website.</p> <p>The deadline for Q1 2022 reporting will be August 15 (same as Q2) due to an application update. The application update will affect form 2.X elements and their associated form 3.X data. The update should not cause prolonged unavailability of the OATI portal.</p> |

| DADSUG | Demand Availability Database System | Serve as the Regional Entity Coordinator in support of the DADS data collection and analysis for NPCC. Oversee the collection of the data in the NERC Internet based data management tool – web DADS. |
| | Status/ Comments: | <p>In December 2020, the DADS Working Group became the DADS User Group (DADSUG). The DADSUG performs the same functions as the DADSWG; however, it no longer reports into the NERC Committee structure. Instead, it reports to the NERC Performance Analysis Department. In response to the recent coronavirus (COVID -19) developments, NERC extended the Q1 reporting deadline for all Section 1600 applications to June 29, 2020.</p> <p>The DADS User Group worked on its Scope to develop a process for soliciting and evaluating DADS changes and recommend selected improvements, such as changes to definitions, metrics, Demand Response Programs. The DADS User Group also discussed the Severity Risk Index correlation with Demand Response Event Days. The DADS User Group has started working on clarification of DADS reporting criteria.</p> |

| GADSUG | Generator Availability Data System | <p>Serve as the Regional Entity Coordinator in support of the Generator Availability data collection and Data System analysis for NPCC. Oversee the collection of the data in the NERC Internet based data management tool – web E-GADS.</p> <p>Status/ Comments:</p> <p>A conference call held on May 24, 2022. 2020 was the first year of having complete data for GADS Wind. Mandatory Reporting for all wind plants with a Total Installed Capacity of 75 MW or greater. The full year of the phased in reporting for GADS Wind will be completed at the end of March 2021. After the completion of phased in reporting, additional GADS wind Validations may be developed.</p> <p>The NERC Reliability and Security Technical Committee reviewed the proposed modifications to the GADS Section 1600 Data Request and approved a 45-day posting for industry comment.</p> <p>Comments received during the 45-day public comment period (June 15, 2021 – July 31, 2021) on proposed modifications to the GADS Section 1600 Data Request have been posted on the Section 1600 Data Request page of the NERC website. Industry, Regional Entity, and NERC staff that developed the Section 1600 data request reconvened to review and respond to each comment.</p> <p>The comments and responses are posted in Excel format to allow for use of the filtering capabilities of Excel. Comments were grouped into topic categories: reporting requirements, clarifications, and implementation, data Reporting Instruction clarifications and updates, and event reporting</p> <p>The GADS Wind Turbine Generation Data Reporting Instructions have been developed to assist wind plant personnel in reporting information to NERC’s GADS Wind Reporting application. The instructions detail the procedures, schedule, and format to follow when reporting data. Wind plants with a Total Installed Capacity of 75 MW or more with a commissioning date of January 1, 2005 or later will be required to report on a quarterly basis.</p> |

| MIDASUG | Misoperation Data Analysis System User Group | Serve as the Regional Entity Coordinator in support of the Misoperation data collection and Data System analysis for NPCC. Oversee the collection of the data in the NERC Internet based data management tool – MIDAS. |
| | Status/ Comments: | <p>The 2022 MIDAS Data Reporting Instructions have been posted to NERC’s website. This is the official published version of the document for 2022, not a draft. This document is intended only to provide guidance for MIDAS reporting as detailed in the Section 1600 Data Request, it is not intended as guidance for any NERC Standards Compliance. This document should be used for topics such as identifying Composite Protection Systems that should be reported in MIDAS, determining the number of Composite Protection System Operations to report quarterly, identifying and coding Misoperations, etc.</p> <p>MIDASUS will conduct another training by the end of 2022. The purpose of the Misoperations reporting and MIDAS Portal training is to assist reporters in using a uniform approach to reporting misoperations and protection system operations using the Misoperation Information Data Analysis System (MIDAS) portal. Benefits of attending include learning the essentials of reporting misoperations as well as learning effective methods for avoiding common hurdles and best practices for MIDAS reporting.</p> <p>The regions discussed their process of collecting Remedial Action Schemes (RAS) Operations/Misoperations quarterly reports. The MIDASUG is in the process of requesting an interpretation by the PRC-004 Standard Drafting Team for the definition of Misoperation. The MIDASUG also discussed compliance requirement DP-UFLS entities.</p> <p>NERC gave a briefing on the Joint Review of Protection System Commissioning Programs 2021 FERC, NERC and REs Report that can be found on NERC’s website.</p> |

| IPSAC | Interregional Planning Stakeholder Advisory Committee | The Interregional Planning Stakeholder Advisory Committee (IPSAC) is an open stakeholder group that provides input for the development of the Northeast Coordinated System Plan (NCSP). The NCSP outlines activities conducted jointly by ISO New England, New York ISO, and PJM. |
| | Status/ Comments: | The IPSAC held a WebEx meeting on May 16, 2022. Agenda items included a presentation of the Regional Planning Needs and Solutions update from PJM, ISO New England, and the New York ISO; discussion of Interconnection Queue coordination; and the draft NCSP 21 Scope. The next stakeholder meeting is anticipated for Fall, 2022. |

TASK FORCE ON COORDINATION OF OPERATION

| Item | Name | Assignment |
|-------|---------------------------------|--|
| CO-10 | Operational Tools Working Group | <p>The Operational Tools Working Group (CO-10) is responsible for taking a lead role in the development of NPCC and NERC operational tools (e.g., electronic tagging, the NERC Interchange Distribution Calculator and electronic scheduling), including hardware, software, and integrated systems. The Operational Tools Working Group will define the need for operational tools, evaluate the cost benefits of operational tools, coordinate their implementation within NPCC and coordinate common training in the use of operational tools.</p> |
| | Status/ Comments: | <p>The CO-10 Working Group continues to review of tool failures and associated lessons learned as generated from the NERC Event Analysis Program and develops regional insights templates from the review of NERC EMS/SCADA lessons learned to further aid NPCC entities in utilizing these valuable lessons.</p> <p>The Critical Operational Tool Failure Analysis report was finalized at the CO-10 WG’s February 10-11, 2022 meeting with the intention of presenting it to Task Force on Coordination of Operation (TFCO) at its March 2022 meeting. However, due to full TFCO agenda, it was requested by the TFCO that the presentation be postponed until the May 11-12, 2022 meeting. The group also conducted a review of the C-46 Document <i>Procedure for Operations Planning Model Data Exchange</i>” as per the schedule for the comprehensive, triennial review, which will also be discussed at TFCO. With regard to the TFCO, request of CO-10 Working Group to review the findings from the “FERC and ERO Enterprise Joint Report on Real-time Assessments” and report back to TFCO any findings and/or recommendations is still a work in progress.</p> |

TASK FORCE ON INFRASTRUCTURE SECURITY AND TECHNOLOGY (TFIST)

| Item | Name | Assignment |
|-------------|--|--|
| IST-1 | Infrastructure Security and Technology (TFIST) Workshop | Periodic workshops presentations to address timely issues and update member system personnel associated with the provision of on-line computer systems for operation of the power system. Last Workshop: November 2019 |
| | Status/ Comments: | The Task Force on Infrastructure Security & Technology (TFIST) presented at NPCC’s Fall 2019 Standards & Compliance Workshop. TFIST expected to present at the NPCC’s 2020 and 2021 Standards & Compliance Workshops and 2022 Spring Workshop; however, the virtual workshop format did not allow time for a TFIST update. The TFIST expects to present at NPCC’s Fall 2022 Standards and Compliance Workshop. |
| Item | Name | Assignment |
| IST-2 | Telecommunications Working Group | Provide a forum to identify, discuss and advance the technology of Telecommunications Infrastructure for the reliable operations of the NPCC Bulk Power System. The Telecommunications Working Group (IST-2) will also support the Task Force on Infrastructure Security & Technology in their work on issues related to Telecommunications. |
| | Status/ Comments: | TFIST submitting the 2021 annual report at the RCC’s June 2022 meeting. The IST-2 Working Group continues to support this testing. |

TASK FORCE ON INFRASTRUCTURE SECURITY AND TECHNOLOGY (TFIST)

Item
IST-4

Name
Cyber Security

Assignment

The purpose of the Cyber Security Working Group is to address specific cyber security issues that are assigned by the TFIST. Although these cyber security topics are assigned by the TFIST, they may be developed by any Task Force or Working Group that require a response or a coordinated effort between Task Forces regarding a cyber security matter.

Status/ Comments:

At its August 14-15, 2019 meeting, the Task Force on Coordination of Operation (TFCO) discussed the recently filed for regulatory approval CIP-012-1 standard and its implementation plan. TFCO members agreed that the impacted NPCC RCs, BAs and TOPs would benefit from a coordinated approach to meeting the requirements of the CIP-012-1 standard. On November 10, 2019, the TFCO requested TFIST consider standing-up ad-hoc Working Group IST-4.

IST-4's whitepaper was posted for Open Process comments from June 14, 2021 to July 29, 2021. The Task Force on Infrastructure Security and Technology (TFIST) endorsed IST-4's responses which did not change the whitepaper. In August 2021, TFIST and TFCO separately endorsed the CIP-012 Whitepaper for Reliability Coordinating Committee's (RCC) approval. The RCC approved this whitepaper at its September 8, 2021 meeting. This whitepaper is available on the public portion of the NPCC web site.

| IST-5 | Physical Security Working Group | <p>The Physical Security Working Group exchanges information regarding approaches to physical security to enhance the reliability and resiliency of the BPS. The Physical Security Working Group (IST-5) also supports TFIST in their work on issues related to Physical Security.</p> |
| | Status/ Comments: | <p>The Working Group continues to develop the living “Emerging Trends” guidance document through collaboration with industry physical security experts and Physical Security Working Group (PSWG) members regarding reemerging threat vectors, suggested mitigation practices, technologies and continued lessons learned as a result of the current COVID-19 pandemic. Member entities continue to contribute changes and adaptations that are needed to their Security plans as new issues and situations arise. This will continue to be an ongoing exercise to address both emerging threat trends and new issues regarding the COVID-19 pandemic. Members of the PSWG continue to share physical security approaches and mitigations to unique situations posed by the COVID-19 pandemic. The 2021 Q4 meeting was held on December 15 2021, in a virtual setting. Items on the agenda for discussion were unmanned aerial surveillance and countermeasures, emerging threats and trends and collaboration with the Gas Sector. Meetings will continue to be held in virtual settings until the end of the COVID-19 pandemic. AGA, through the attendance of their Managing Director, Security and Operations and Intelligence analysts shared intelligence on what they considered emerging threats and trends and their security strategies to combat those issues. The Q1 PSWG meeting is scheduled for March 2022; the final date to be determined.</p> <p>Members of the Working Group and NPCC staff continue to work closely with the NERC E-ISAC and Pacific Northwest National Labs to develop a virtual version of the Design Basis Threat program. An NPCC Registered Entity has volunteered their site to be used for development of a generic site with attributable characteristics removed so the site cannot be identified. 2021. GPS mapping, assessment and characterization of the site was completed in October 2021. A final 3d model of the site is expected to be completed by April 2022. Three NPCC Registered Entities continue to express an interest in conducting a DBT exercise face to face at their sites when Pandemic restrictions are lifted.</p> |
