**The NPCC Task Force on System Protection (TFSP) Response to Comments Received to the NPCC Open Process Posting of a TFSP Response to a Request for Criteria Clarification on Directory #3 Maintenance Criteria BPS Protection.**

TFSP would like to thank those who provided comments on its response to a Request for Criteria Clarification on Directory#3 *Maintenance Criteria BPS Protection* which was posted from October 16, 2014 to November 30<sup>th</sup>, 2014.

The Task Force responses to individual comments are provided below.

***Comment from United Illuminating:***

*I do not agree with response to Question 2.*

*I agree that the language in Directory 3 is clear and there is no exception given in Section 5.7.1 for load rejection (LR) as part of a Type I SPS. I disagree with the second paragraph.*

*The second paragraph only states that TFSP sympathizes with the requester. There is no purpose to including it and it only detracts from the clarity of the first paragraph.*

**Task Force response: TFSP would like to thank United Illuminating for taking the time to review the posted draft document and submit this comment.**

**TFSP agrees with the comment and will remove the second paragraph from the final document.**

***Comments from Dominion:***

*Dominion has no comment.*
