**Subject: Open Process Posting of NPCC Document C- 33 *Procedure for Analysis and Classification of Dynamic Control Systems* ---TFSS Retirement Recommendation.**

The Task Force on System Studies (TFSS) has recommended that document C- 33 *Procedure for Analysis and Classification of Dynamic Control Systems* be retired.

The TFSS has determined that the development of certain NERC Standards, including FAC-002-2, VAR-002-4.1, MOD Standards (MOD-026-1, MOD-027-1, MOD-033-1), PRC Standards (PRC--001-1.1, PRC-002-2, PRC-005-1.1b), has resulted in ERO requirements that address the reliability concerns that document C-33 is intended to cover.

The TFSS has reviewed its recommendation to retire C-33 with the NPCC Task Force on Coordination of Planning (TFCP) and provided additional detail to the TFCP in support of this recommendation.

Accordingly, the TFSS has also recommended a conforming change to NPCC Directory #1 Appendix B *Guidelines and Procedures for NPCC Transmission Reviews*.

Please find attached a copy of document C-33, a redlined version of NPCC Directory #1 with proposed changes to Appendix B and a comment form designed to facilitate Member feedback on this proposal.

The NPCC Open Process review may be accessed through the following:

<https://www.npcc.org/Standards/SitePages/NonStandardsList.aspx>

Comments on the proposed retirement of C-33 will be received for forty-five days through October 12, 2019.

Please contact me with any questions regarding the NPCC Open Process or the content of this document.

Thank you.
