Subject: NERC Ballot- Project 2014-01 Applicability for Dispersed Generation Resources Standards

Importance: High

NPCC Entities of the NERC Registered Ballot Body,

The subject project is posted for an initial ballot through 8pm August 25th, 2014. The NPCC Regional Standards Committee has not identified any issues that would preclude an Affirmative ballot position. This portion of the Dispersed Generation Project involves the revision of two versions of the PRC-004 Protection System Misoperations standard. One is a FERC approved version and the other is an in-process revision that is still under development. Which version is filed with the FERC will depend on the timing of the regulatory approvals. Either version is satisfactory for the purposes of this ballot.

NPCC as the Regional Entity will be casting an **Affirmative** ballot and submitting comments.

Please contact me with any questions.
