**Subject:** NERC Ballot- Project 2015-07 Internal Communications Capabilities

**Importance:** High

NPCC Members and Entities of the NERC Registered Ballot,

The subject standard project, involving revisions to COM-001, is currently open for an Additional Ballot through 8pm May 6<sup>th</sup>, 2016 (today). The project scope was to develop requirements for internal communication capabilities to address FERC directives in Order 808. The revision satisfactorily addresses the FERC directives regarding ensuring the adequacy of internal communications capability whenever internal communications could directly affect the reliable operation of the Bulk-Power System and issuance/receipt of Operating Instructions. The Regional Standards Committee (RSC) has identified no issues precluding support. RSC recommends an Affirmative vote to accept the standard and a Yes for the non-binding poll on the VSLs and believes the standard supports reliable operations of the BES.

If you have any questions please contact me.

Thanks,

Guy V. Zito
