Subject: NERC Ballot- Project 2015-09 Establish and Communicate System Operating Limits
Date: Tuesday, December 1, 2020 12:54:35 PM

RSC Members,

Project 2015-09 Establish and Communicate System Operating Limits is currently posted for a 45-day formal comment period through 8 p.m. Eastern, Monday, December 7, 2020 for FAC-014-3 – Establish and Communicate System Operating Limit and the Implementation Plan. Ballots for the standard and implementation plan, as well as a non-binding poll of the associated Violation Risk Factors and Violation Severity Levels are currently being conducted November 27 - December 7, 2020. The main change which affected the previous ballot was the 12 month proposal for the Implementation Plan. This has now been extended to 24 months. Please indicate if there are any outstanding issues which would preclude your support. We will be discussing the standard further at our Thursday December 3rd, 2020 RSC meeting so please be prepared to bring any issues up at that time.

NPCC at this time plans to cast an Affirmative Ballot and Positive opinion on the non-binding poll.

Thanks,

Guy V. Zito
Chair RSC
