Subject: NERC Project 2020-06 Verifications of Models and Data for Generators Additional Ballot Recommendation
Date: Wednesday, January 18, 2023 4:02:48 PM

NPCC Members and Entities of the NERC Registered Ballot Body:

The NPCC Regional Standards Committee (RSC) has followed the drafting activities of the Project 2020-06 Verifications of Models and Data for Generators drafting team. Currently, there is a ballot period open through 8 p.m. EST, Wednesday, January 18, 2023, for the subject project. The project proposes revisions to the following standards and has an associated Implementation Plan.

-MOD-026-2 – Verification of Dynamic Models and Data for BES Connected Facilities: No Recommendation
-MOD-026-2 – Implementation Plan

This project proposes to revise MOD-026-1 and MOD-027-1 and/or create a new standard to clarify requirements related to IBRs (Inverter-Based Resource) and to require sufficient model verification to ensure accurate generator representation in dynamic simulations.

NPCC as the Regional Entity will be casting an **"Abstention"** on the posted materials.

Thanks,

Ruida Shu
