Subject: NERC Project 2021-02 Modifications to VAR-002-4.1 Initial Ballot Recommendation
Date: Thursday, January 12, 2023 3:40:56 PM

NPCC Members and Entities of the NERC Registered Ballot Body:

The NPCC Regional Standards Committee (RSC) has followed the drafting activities of the Project 2021-02 Modifications to VAR-002-4.1 drafting team. Currently, there is a ballot period open through 8 p.m. EST, Friday, January 13, 2023, for the subject project. The project proposes revisions to the following standards and has an associated Implementation Plan.

-VAR-002-5 – Generator Operation for Maintaining Network Voltage Schedules – Ballot Recommendation: No Recommendation
-VAR-002-5 – Implementation Plan

The purpose of this project is to clarify VAR-002-4.1, Requirement R3, regarding whether the Generator Operator (GOP) of a dispersed power resource must notify its associated Transmission Operator (TOP) upon a status change of a voltage controlling device on an individual generating unit; for example, if a single inverter goes offline in a solar photo-voltaic (PV) Facility.

NPCC as the Regional Entity will be casting an “**Abstention**” on the posted materials.

Thanks,

Ruida Shu
