Unofficial Comment Form
Draft 2022-2024 Reliability Standards Development Plan

Do not use this form for submitting comments. Use the Standards Balloting and Commenting System (SBS) to submit comments on the Draft 2022-2024 Reliability Standards Development Plan (RSDP) by 8 p.m. Eastern, August 30, 2021.

Additional information is available on the Reliability Standards Development Plan page. If you have questions, contact Manager of Standards Development, Latrice Harkness (via email) or at 404-446-9728.

Background Information
The 2022-2024 RSDP provides insight into standards development activities anticipated at the time of publication so that stakeholders may make available appropriate resources to support the identified standards development objectives. Additional activities, such as Requests for Interpretation and development of Regional Variances, may impact the plan, which is a snapshot of activities anticipated for the 2022-2024 period. In order to help the industry understand resource requirements for each project, the RSDP now shows timeframes and anticipated resources for each project under development.

Next Steps
NERC staff will consider all industry comments received during this posting and present a revised RSDP draft to the Standards Committee for approval. The RSDP will then be presented to the Board of Trustees (Board) for endorsement. Any projects presented to the Standards Committee after this comment period and before the Board endorsement will be incorporated into the final RSDP. Upon Board approval of a motion to endorse the RSDP, NERC will file the RSDP with the appropriate regulatory authorities.
Questions

1. Do you see any items that are missing from this draft of the RSDP?

☐ Yes
☐ No

Comments: We suggest adding project 2021-06 Modifications to IRO-010 and TOP-003 to the RSDP.

2. Please provide any additional comments you would care to offer.

Comments: We suggest removing project 2020-04 Modifications to CIP-012 from the 2022 High Priority Project List since this project is planned to be completed in 2021.
